 ...THE DISPLAY IRIS IS HERE JUST FOR YOU...

The company MYLIFT s.r.o. is pleased to present the new display «IRIS», which, thanks to attractive graphics and the possibility to adapt fully to your needs, allows showing the selected information aimed directly to the user.

Advertising of the product, services presentation, and/or extending of options is very easy and effective due to the fact that user's attention in the cabin is attracted by dynamic images and texts. Thus the user will be able to evaluate the additional services.

Variability of the system allows to work autonomously or in symbiosis with elevator, with texts, images, music and/or recorded messages sequentially or by the floors.

The system «IRIS» can be installed individually or together with a new cabin panel what increase the aesthetic character of the cabin and its elegance.

The speed of assembly and updating ensures almost continuous operation, and so minimize the discomfort of the user in case of elevator's shutdown.
