The company MYLIFT s.r.o. is pleased to present the new «ITALA» system which, thanks to the modern hardware and software technologies ensures high versatility and reliability, which together with new functional concepts makes this product one of the top in the international market.

Based on many years of experience we have created a competitive product suitable for different types of installations, widely applicable and therefore economical.

Elasticity of the system allows installation of an old elevator or system preservation in a new one in case of reconstruction, and it merely by extension of switchboard for the eventual expansion boards and/or reprogramming.

High memory and program capacity guarantee the excellent personalization, whether it is a hotel or an apartment house, or traction, without machine room or hydraulic elevators.

The switchboard is equipped with:

- 10 programmable relay outputs
- 8 relay outputs for display
- 3 relay outputs for echo of floor call sensors
- 2 serial outputs for floor displays
- 28 inputs standard
- 12 programmable inputs
- 12 inputs for shaft options
- Serial ports for expansion boards

Cabin board is equipped with:

- 2 serial outputs for cabin display
- 28 inputs standard
- 12 programmable inputs
- 12 inputs for cabin options
- Serial port for expansion boards

Expansion boards:

- Display for visualization and programming
- Feeding
- Safety circuits
- Relay outputs
- Optoisolation outputs
- Optoisolation inputs
- Inputs for options

For more information contact our staff, we will be glad to prepare the customized solution suitable to your needs.
